

## READING

Remember to read at least 3-4 times a week. Ask an adult to write in your reading record.

## SPELLINGS

The children will be given spellings to learn for weekly tests on a **Friday**.

## MATHS

Practice your maths by logging on to NumBots (see individual login)

Go on a winter walk and look for evergreen and deciduous trees. What is the difference?

**Can I walk there?**

Be an engineer like Isambard Kingdom Brunel and build something out of objects you have at home. Maybe you could make a bridge, a tunnel or a ship just like he did.

Compare the weights of different objects in your home. Which is the heaviest, which is the lightest?

Make a cosy reading space indoors with blankets and cushions. Settle down with some of your favourite books.

Take a walk around your local area. What **physical features** can you find? You might find a woodland, a hill, a river, soil, a valley, some vegetation (types of plants).

## PLATFORM 1 HOMEWORK

TERM 3

This is your pick and mix homework.  
Each is worth **3 points**.

Complete **at least 1** of these activities each week if you can, and send us a photo of your work via email or Instagram so we can share it in class.

Take a walk around your local area. What **human features** can you find? You might find a factory, a farm, an office, a house or a shop.

Watch and enjoy the story: *On The Way Home*, by Jill Murphy

<https://video.link/w/3yrRc>

Think of a different way you could have grazed your knee on the way home from the park. Draw a picture to show what happened.

## Homework Certificates

Bronze 6 - 9

Silver 10 - 15

Gold 16 - 20

Platinum 21+

Practice your word processing skills by typing a letter to a friend in your class.
